Your children are at risk.

Are you equipped?

Internet Safety 101: Empowering Parents

No child is immune to risks online. The Internet has opened the door for **predators to sexually exploit unsuspecting children**, and online, every child is just **one click away** from **obscenely graphic** and **addictive pornography**. New threats like **cyberbullying** also flourish online. Although parents and other adults are the *first line of defense* against online threats, many feel **uninformed** or **ill-equipped** to deal with evolving issues of Internet safety and need credible outside help.

The Internet safety experts at Enough Is Enough (EIE), developed **Internet Safety 101: Empowering Parents**, the four-part, DVD teaching series and workbook, to equip and empower **you** to protect the children under your care from Internet risks. Internet Safety 101 delivers a dynamic message about Internet threats and safety solutions with: **victim testimonials, guidelines from enforcement/field experts, expertise from EIE President and nationally recognized Internet leader Donna Rice Hughes, and tips and tools from Industry authorities**.
