

NET NANNY PARENTAL CONTROLS

How Does Net Nanny Work?

Net Nanny uses dynamic contextual analysis (in conjunction with URL lists) to filter Web content. As Web pages are requested, Net Nanny's dynamic analyzing engine has the ability to understand its context and filter appropriately. Net Nanny's state-of-the-art dynamic contextual filtering engine ensures that your family members won't be exposed to pornography and other offensive content.

Net Nanny is the most trusted family-oriented filter that can be used as configured right "out of the box" or you can customize the filter settings according to your personal preferences and needs.

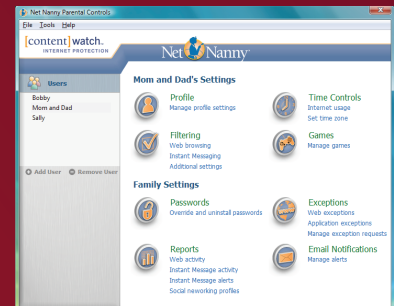

Top Rated Parental Control Features & Benefits

Stylish and User-Friendly - Net Nanny offers a simple, easy to use set-up assistant to help parents determine what online activities (Web sites, chat, gaming and social networks) are appropriate based on their children's age.

Remote Management – Powerful Remote Management tools to help parents manage and maintain Internet policies from any Internet connection. Net Nanny has been enhanced to synchronize your settings almost instantly.

Predator and Cyberbully Alerts - Net Nanny's new Instant Message Monitor feature examines the content of Instant Messages and alerts parents to possible online predators, cyberbullies and other inappropriate contacts and comments made through popular Instant Messaging programs.

Social Networking Dashboard - Parents can easily access and view their children's Social Networking activities on commonly used sites like Facebook™, through Net Nanny's powerful new Social Networking Dashboard feature.
